

ATMega32 Development Environment Analysis: The need for a Linux environment!

Required tools:

- Wsl
- Debian (wsl distro)
- Platform IO (vs code) extension
- SimAvr (cli tool)
- Gtk Wave (probably cli)

Steps to success:

1. enable wsl
2. install wsl linux distro
3. install wsl server (vs code) extension
4. install Platform IO in WSL vs code
5. install SimAvr for creating .vcd files
6. install gtkWave for visualizing ports using .vcd files
